LIQUID RUST REMOVING SOUR

This is a quality product formulated to remove rust while neutralizing any harsh chemical residues in linen. This will aid in the protection of fabric harshness and skin irritation. It is ideally suited for use in food plants and other industrial and institutional laundry applications.

DIRECTIONS FOR USE: When used for normal souring operations with water supply containing iron, use 1 - 2 oz per 50 lbs of fabric in last rinse cycle. The final pH should be kept at 5 if fabric needs brightening from earlier build up of iron.

To remove iron stains and for badly discoloured fabric, use 2 - 3 cups of product per 50 lbs in wash cycle (do not use detergent, alkali or bleach with it). Water temperature should be kept at 60-80°C (140-180°F). This procedure should be followed with 3 - 4 rinses leaving a final pH of 5 or higher. Excess product should be rinsed out.
